

SheltersDirect

“first choice”

Owner: Camden High School

Project Location: Camden, New Jersey

Project Description:

Shelters Direct was contracted to provide and install (2) two 17 feet x 103 feet pre-engineered steel walkway canopies for Camden High School in Camden, New Jersey to protect students from the elements as they travel between classes. These walkway canopies each feature eighteen (18) square steel columns and twelve (12) feet of clearance between the fascia and grade. The roofing of these walkway canopies were completed in a conventional bottom deck configuration.
