

## PROJECT INFORMATION SHEET

**Owner:** Glenwood Fire Station  
Glenwood, MD

**Project Description:** This project included the fabrication as well as offload and anchoring of a 12 x 15 Steel Pump Enclosure building by Shelters Direct. Due to the complexities of the fire pump that this enclosure would be housing, it was determined the best build was to not include a floor in this enclosure. The enclosure has a custom paint that matches the Fire House as well as having roof hatch to access the fire pump, a custom panelboard and a high temp exhaust fan and gravity louvers.
