

## **PROJECT INFORMATION SHEET**

**Owner:** Greater Southeast Community Hospital  
Washington, DC

GREATER SOUTHEAST  
COMMUNITY HOSPITAL

**Project Description:**

Shelters Direct was contracted to furnish and install an 8' x 32' decontamination shelter to be used adjacent to the Emergency Room area in the event of a biological or chemical terrorism attack. The shelter system was manufactured by Shelters Direct and our staff participation in this design build project included the following tasks:

- Coordinated layout of proposed site
- Prepared engineered drawings
- Excavated and installed concrete foundation, retaining wall, and handrail assembly
- Installed all plumbing (water lines, wash down showers, backflow preventer, & drain lines)
- Installed 2500 gallon containment storage tank fed from floor drains
- Provided all required power and electric (lighting, heating, tank alarms)
- Unloaded and installed shelter assembly
