

PROJECT INFORMATION SHEET

Owner: The Universities at Shady Grove (University System of Maryland)
Rockville, MD

Project Description:

Shelters Direct was contracted to supply and install a 6' x 19' 9" Aluminum Stairwell Shelter with Acrylic Dome Roof and Solar Powered LED Lighting System. The use of solar lighting offers environmentally-friendly renewable energy. The structure was designed to provide cover to students and faculty when walking to and from the exposed top level of this parking garage. The photographs below represent the site before and after the installation of the shelter.
