PROJECT INFORMATION SHEET

Owner: United States Army - Fort Detrick
Frederick, MD

Project Description:

When the highly secured U.S. Army Base Fort Detrick was looking to secure their entrance gates they contacted Shelters Direct and requested our experience in designing and implementing new security measures. Focusing on obtaining results satisfactory to all departments the project was considered a huge success.

Part of the design for this project involved complex installation issues that Shelters Direct was able to overcome by having it's own installation crews complete a "turn-key" project from start to finish. The salient characteristics of this project included:

- Three (3) UL 752 Bullet Resistant Guard Booths with fully functioning restroom facilities
- Underground utility installation to include: new electric feeds, sanitary sewer connections & two (2) septic holding tanks for a remote areas, underground water line installation and telephone/network communication lines

Once the Owner saw the attention to detail provided by Shelters Direct they quickly contracted additional work to include the installation of hydraulic "pup-up" bollards, tire shredders, and additional road/site work.

FEATURED PROJECTS

PROJECT INFORMATION SHEET

Owner: U. S. Fish and Wildlife
Patuxent Wildlife Research Refuge
Laurel, MD

Project Description:

Shelters Direct was contracted to furnish and install a 4' x 8' guard booth including the following items:

- Coordinate layout of proposed site
- Prepare engineered drawings
- Excavate and install concrete foundation and steel bollards
- Excavate trench and connect to existing electrical service. Also included was the installation of a "heavy-up" upgrade to the local power supply
- Mount and install traffic signal devices/lights with controls

PROJECT INFORMATION SHEET

Owner: Sanofi-Aventis
Bridgewater, NJ

Project Description:

When Sanofi-Aventis, a major international pharmaceutical company, had a problem with identifying how to provide a proper location for their smoking personnel they turned to Shelters Direct to provide ideas and assistance. The outcome turned into a project that had Shelters Direct manufacture two (2) 6 x 10 steel shelters and provide on-site installation services including:

- Design drawings
- Permit acquisition
- Site work – excavation, concrete pads, sidewalks, grading, and landscaping
- Installation of the shelters

PROJECT INFORMATION SHEET

Owner: National Institutes of Health (NIH)
Bethesda, MD

Project Description:

When a large "National" competitor to Shelters Direct failed to deliver on the new entrance gate guard booths at NIH in Bethesda, MD the Owners Representative (Brown & Root Services) and the general contractor called on Shelters Direct to provide immediate assistance in taking over the contract. The result in our ability to quickly provide pricing, drawings, and expedited lead times on stainless steel UL 752 Level 3 bullet resistant guard booths resulted in seven (7) booths being ordered. These customized booths were manufactured with stainless steel and provided overhangs to keep guards dry in foul weather.

PROJECT INFORMATION SHEET

Owner: Andrews Air Force Base (Maryland)
Base Hospital

Project Description:

Shelters Direct was contracted through our GSA Federal Supply Schedule to furnish and provide a smoking shelter for the hospital on base. The shelter requested was an aluminum shelter and required Shelters Direct to erect and install the shelter on a concrete pad supplied by the Government. The shelter included:

- A fully enclosed half glass structure with no open ventilation space
- An ADA entrance door with automatic closer
- An integral electrical load center with interior lighting, HVAC and an exhaust fan
- Interior seating was provided with surface mounting benches
- Ashtrays and trash receptacles were provided for courtesy use

PROJECT INFORMATION SHEET

Owner: United States Navy
Naval Weapons Station - Yorktown
Yorktown, Virginia

Project Description:

Shelters Direct was contracted in an effort to provide overhead canopies for the entrance gates and the truck inspection area for The Naval Weapons Station – Yorktown, VA. In an effort for the base to comply with new perimeter security initiatives several canopies and guard booths were furnished. The canopies were erected during off-peak hours in order not to disturb current traffic flow.

PROJECT INFORMATION SHEET

Owner: New York City Metro Transit Authority (MTA)
Multiple Locations – Omega Booths
New York, NY

Project Description:

Shelters Direct furnished thirty-one (31) UL 752 Level 4 Bullet Resistant Guard Booths that are placed throughout the New York City Subway system to protect certain vital areas within the tunnels. This contract required Shelters Direct to visit all thirty-one (31) sites and perform measurements and layout requirements. Once completed these booths had to be manufactured to allow for being placed on a work train and positioned on the Subway platforms.

PROJECT INFORMATION SHEET

Owner: The John F. Kennedy Center for Performing Arts
Washington, DC

Project Description:

The Kennedy Center, located on the banks of the Potomac River near the Lincoln Memorial in Washington, D.C., is renowned as one of the premier facilities in the world for performing arts. Because of the high profile this facility maintains they had a need for special transit shelters and not just any ordinary shelter would suffice for this site. In an effort to turn their attention away from the standard aluminum shelters on the market, Shelters Direct worked with the local engineer and architect to come up with a design that would stand alone from others. The shelters included:

- Arched / Curved Roof
- Angled Frame Construction
- Stained Mahogany Wood Bench Seating
